REASONS FOR ALLOWANCE

The following is an Examiner's Statement of Reasons for Allowance:

The applicant's amendment filed on 2//23/06 overcomes the technical deficiencies and the prior art rejection. Claims 5-6, 12 and 14-20 are allowed because the prior art of record does not suggest "an operational amplifier having a normal phase input terminal, an inverted phase input terminal, and an output terminal, the first and second element blocks being provided between the inverted phase input terminal and the output terminal, wherein the first input terminal is provided at a side including the inverted phase input terminal of the operational amplifier, and a second input terminal connected to a connection point of the first element block and the second element block for receiving the second electric current is an electric current whose direction is the same as that of the first electric current" as combined in claims 5-6, and "a loop tilter including a first element block which has a capacitive element, a second element block which has a resistive element and is connected in series to the first element block, a first input terminal for receiving a firs electric current, and a second input terminal for receiving a second electric current, which is connected to a connection point of the first and second element blocks and a total voltage generated in the first and second element blocks being employed as an output signal" as recited in claim 12. In particular, the first element block (54) of Dent (US 5,180,993) is the resistor, not the capacitive element as claimed.

CONCLUSION

Application/Control Number: 10/815,672

Art Unit: 2816

Any comments considered necessarily by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DINH T. LE whose telephone number is (571) 272-1745. The examiner can normally be reached on Monday-Friday (8AM-7PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, TIMOTHY CALLAHAN can be reached at (571) 272-1740.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
